## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. § 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-25 are rejected under 35 U.S.C. § 102(b) as being anticipated by Iwazawa. (JP 3-45351)

Iwazawa (fig.1, see also constitution) discloses every element of the instant claimed subject matter, including two sets nozzle arrays for applying at least ink materials of cyan, magenta, yellow, and black arranged in symmetry in the scanning direction.

The limitation of the method claims 20-24 are clearly anticipated by the arrangement of the Iwazawa heads group.

The functional claimed limitation "the recording elements for applying ink materials of a different amounts" and "the recording elements for applying ink materials of a same amounts" of claims 10, 11, and 25 are deemed to be anticipated by any known controller such as one in Iwazawa for varying the ink amount since the applying ink materials of a different amounts are not limiting the claimed limitation to the physical structure of the nozzle.
